
Protection tiers on the four logical qubits (each circle is one physical qubit)

No protection
4 physical qubits

Bit flip code on qubits 0 and 3
8 physical qubits

Bit flip code on all qubits
12 physical qubits

Error aware rule (example)
16 physical qubits

1 circle = bare qubit, 3 circles = repetition code (the phase flip code has the same layout, in the Hadamard basis), 9 circles = Shor code
